Anveshana 2026

Ayurveda is the system of medicine which focuses on both healthy and unhealthy. Even though the system is in practice since many centuries, the questions of its effectiveness raises time to time. These questions can be efficiently answered by the Medical research and statistical evidence which is accepted worldwide. Efforts are on to prioritise Medical research as it is the era of the evidence based medicine. Evidence can be generated from perfect study designs, which can be formulated only with the thorough knowledge of the Medical research. But, conducting research is only half way. Accurate interpretation of the outcome of the research with the help of appropriate statistical tools complement the entire research study.

S.D.M. College of Ayurveda, Hospital & Research Centre, Udupi

S.D.M. College of Ayurveda, Hospital & Research Centre, Udupi is a recognized centre of excellence and one of the premier institutions of India offering undergraduate, Postgraduate and Doctor of Philosophy courses.
